Technical Skills

Testing & QA:
Test Case Design, Manual Testing, Defect Reporting, Test Analysis, API Testing, Usability Testing

Test Automation:
Test Automation Concepts, Automation Strategy, Scripting Fundamentals (Playwright, Cypress, Selenium, Karate, K6, Trivy)

Development:
JavaScript, React, HTML, CSS

DevOps & CI/CD:
CI/CD Concepts, Build & Deployment Pipelines, Version Control (Git)

Infrastructure & Tools:
Docker, Nginx, Linux (Basic), Leaflet

Core Concepts:
SDLC, STLC, System Debugging, Software Quality Engineering

Experience

Test Analyst (Intern)
Alula Technologies — Pretoria (Hybrid)
May 2025 – Present

- Executed manual test cases and identified critical defects
- Validated requirements with stakeholders and developers
- Analyzed results and reported issues, including database and usability

Web Developer (Contract)
C. Steinweg Bridge Ltd — Johannesburg (On-site)
Aug 2024 – Nov 2024

- Built and deployed a marketing website for a cargo tracking platform (React, Docker, Nginx)
- Integrated real-time tracking using Leaflet

Software Tester
Johannesburg
Mar 2024 – Sep 2024

- Designed test cases and executed functional testing
- Reported defects with clear reproduction steps

About Me

QA Engineer with hands-on experience in enterprise testing and a full-stack foundation. Pursuing a BSc in Computer Science while working full-time, focused on advancing into test automation and release engineering.

Flagship Project

BrikByteOS — **Release CLI Platform**

- Designed and building a Go-based CLI tool to unify testing, security, and quality signals into a single release decision system
- Implements deterministic execution and normalized result schemas for consistent outputs across environments
- Introduces policy-based quality gates (OPA/Rego) to enforce "safe-to-ship" decisions
- Generates audit-ready evidence bundles for traceability and compliance
- Focused on solving enterprise challenges of fragmented QA tools and unreliable release signals

Github: https://github.com/BrikByte-Studios/brikbyteos-cli

CaloriSee **(AI-Powered Nutrition App)**

- Built a full-stack application to log meals, retrieve nutritional data, and recognize food via AI
- Integrated image recognition features for food identification
- Focused on user experience and real-time feedback for dietary tracking

Education Background

Bachelor of Science in Computer Science & Mathematics *(In Progress)*
University of South Africa
2026 – Present

NQF 5: Systems Development
WeThinkCode
2022 – 2024

Bachelor of Science in Construction Studies
University of the Witwatersrand
2017 – 2021
